a final and accurate statement before Wednesday, but that expenses of al kinds would approximate \$950,000, and taxes on his share \$100,000, while the gross gate receipts were expected to exceed \$1,600,000.

It was also figured out that Dempsey earned in the neighborhood of \$29,000 per minute for his ten minutes and 16 seconds of actual fighting. Carpentiers profit as the loser in the contest will approximate \$19,500 per min-

The United States government will receive, in one form of taxation or another, a considerable portion of the \$300,000 paid Dempsey and the \$200,000 which was Carpentier's share of the purse. The total government proceeds from the bout will tota more than \$400,000, revenue ofcials estimated. The income tax will take about \$160,000 of the \$300,000 earned by Dempsey and about \$77,000 of Carpentier's share. The federal revenue from the sale of tickets wil amount to about \$160,000.

How Jack Won The Fight

A crushing right swing from the fist fighter shattered the titular aspirations of Georges Carpentier, in the fourth round of the socalled "battle of the century." The pile driving blow landed flush upon the jaw of the Frenchman, flooring Carpentier for the second time in a trifle more than a minute of fighting, in the final and decisive round.

Altho he had staggered to his feet after the initial knockdown he was unable to survive the second knockdown and was motionless when referee Harry Ertle tolled off the fatal ten counts.

Altho the knockout punch was driven to Carpentier's jaw, the way to Dempsey's victory had been paved by a continual bombardment of blows which landed on every section of the Frenchman's body. Fight In Pictures

Jersey City, N. J., July 4 Jack Dempsey saw himself in action yesterday at a motion picture show. He watch ed every blow. He was keenly interested in the blow in the second round in which Carpentier staggered the champion. Dempsey saw himself totter and sway. Perhaps not until he saw the picture did he realize just how near he came to dropping, for after the fight Dempsey declared the blows did not bother him. The champion marveled at the gameness of the Frenchman

After Year's Trial of Government by Women, Wyoming Town Is Satisfied.

Place Once Rendezvous for Desperadoes Transformed by the Women-Now Kept Clean Morally and Physically-Many Reforms

Jackson, Wyo.-Jackson, after a year's trial of petticoat government, has found it good.

Half a century ago the first jury of women to be impaneled in the United States was drawn in Wyoming and 20 years later Wyoming insisted, and won its point, that it be admitted to the Union without one single change in its constitutional provision giving women equal suffrage rights with men. Since then the feminist movement has developed astoundingly. And so, when the votes were counted at Jackson at the recent election, they showed the following re-

Weber Wagon Value At half price would you purchase any automobile in 60-inch

At half price could you sell to a farmer any automobile in 60-inch track?

Why mislead a farmer into buying a farm wagon that won't track with the automobile?

What better path could a wagon use than the one made as shown above?

When you purchase a Weber Farm Wagon you get more than just a farm wagon. That fact alone is worth looking into.

Some wagons are sold more for the purpose of making a sale and as large a profit as possible than for giving service.

Some dealers are antagonistic to the Standard Track (the one track for every section of the United States) for farm wagons; the 56-inch auto track (not wide or narrow) because they have not got the agency for the Weber.

Some dealers will talk a farmer into buying a 60-inch old-track farm wagon, but when such a dealer goes into the country on business or pleasure does he use a 60-inch track farm wagon, leaving his automobile at home because the 56-inch track is wrong? NO, he uses 56-inch track to go anywhere and everywhere.

Ask the dealers selling automobiles if they have any trouble selling 56-inch track—if they could sell automobiles in 60-inch track even at half price. The answer will be NO.

What track should your new farm wagon be? The Standard 56inch track, which is neither wide nor narrow.

Survey by Government Bureau Shows California Sets Marks for United States.

Washington.-The hisnest and lowest points in the United States are in California, within ninety miles of each other, says a bulletin issued by the geological survey. Mount Whitney, the highest point, is 14,501 feet above sea level and in Death valley there is a depression that lies 276 feet below sea

The difference in height of these two points is small, however, the survey states, as compared with the difference in the height and depth of land in Asia. Mount Everest rises 29,002 feet above sea level, whereas the shores of the Dead sea lie 1,290 feet below.

Information in the hands of the survey shows that the greatest depth yet found in any ocean is 32,088 feet, a depth at a point about 40 miles north of the island of Mindanao in the Philippines. This would make the bottom of the sea at that point more than 111/2 miles below the summit of Mount Everest.
